

EXPLANATION

- Assessment tract type – heavy-mineral placers**
- Low-potential (L) tract with moderate (C) certainty
 - Permissive geology
 - Placer gold occurrences
- Base data**
- USGS study area boundary
 - Proposed withdrawal areas
 - County boundaries

Figure 34. Inset map showing a mineral-resource-potential tract for heavy-mineral placer-type deposits, in context of permissive geology and occurrences for the southwestern part of the study area for the North-Central Idaho Sagebrush Focal Area.
